

correction nuit

resurfacing corrective cream

product description:

fluid emulsion containing a unique and optimized association of aha, bha, vitamin c and redensifying biomimetic peptide. the combination of exfoliating glycolic acid and sebo-regulating salicylic acid helps reduce sebum secretion and shrink the pore size, while smoothing and refining the skin texture. vitamin c brightens the skin complexion and combined with the biomimetic peptide, it helps boost the synthesis of collagen and elastin. thus, after repeated applications, the known properties of these different active ingredients will help improve the skin texture, color, firmness and elasticity. genuine texturing and skin booster cream, correction nuit is especially adapted for the treatment of normal to oily skin as well as skin with imperfections.

main active ingredients: biomimetic peptide, vitamin c, glycolic acid, salicylic acid.

directions for use: to be used at night on clean and dry skin. for external use only.

presentation: airless flask 50 ml.

things worth knowing: anti-aging and anti-wrinkle treatment contains an optimized combination of aha and bha with peeling-effect that act on both the sebaceous secretions and the pore size to smooth and refine the skin texture. vitamin c and the biomimetic peptide act as genuine skin boosters on tissue brightness, translucency and cutaneous firmness. especially recommended for the treatment of normal to oily skins as well as skin with imperfections.
